

EX

Extremely efficient

VAN HOOOL

The **EX** vision.

Sleek timeless design, with the familiar Van Hool DNA.

Optimal comfort and a sense of safety are the essential requirements of the modern passenger on long journeys. For short routes and scheduled services, flexibility and ease of maintenance are indispensable. It is a huge challenge for contemporary operators to achieve all these aspects in an ecologically and economically responsible way, while maintaining efficiency and elegance.

Together with you, we will take on this challenge. EX: Extremely efficient

The **EX** concept.

The EX embodies a modern, streamlined design that reflects the character of efficiency and elegance, both on the inside and outside. With its versatility and flexibility, this vehicle offers a modular concept. Thanks to Van Hool's proven reliability, the vehicle can be adapted to the specific requirements of any kind of passenger transport, without compromising on quality, safety or comfort.

The flexible modular concept allows vehicles to be built for a wide range of applications: from comfortable coaches to fully equipped 2- or 3-axle vehicles with ample luggage space and room for 65+1+1 passengers, with or without a toilet, narrow or wide middle door, and with or without a wheelchair lift.

Moreover, the EX's powerful powertrain complies with the strictest environmental regulations, making it ideally suited for long journeys, intercity trips and regular scheduled services.

Research and **EX**pertise.

European excellence, laced with the characteristics and values that Van Hool embodies.

The EX was designed and developed at Van Hool's parent company in Koningshooikt, Belgium. The design team studied the needs of the transport sector, listened to the customers, and designed the entire EX transport concept based on this. This is of course combined with Van Hool's "tried and tested" engineering and technology, the result of years of research and experience.

The EX rolls off the production lines at the extensive state-of-the-art factory in Skopje, Macedonia. More than 1,200 locally trained and highly motivated technicians work here, already well-proven in building top-quality vehicles for the demanding US market. In this facility, the principle of 'Lean Manufacturing' is applied, resulting in an efficient and economical production process.

EXtremely efficient.

Updated and innovative elements, such as the highly functional dashboard and the seats, bring greater comfort and ergonomics for passengers and driver alike.

The steering wheel is equipped with ergonomic control buttons, making it easy to operate functions such as the media system, phone and cruise control.

Thanks to its modular capabilities, the EX offers flexible capacity.

Optimal accessibility due to flat floor and wheelchair facilities.

The compact luggage racks and hatches open effortlessly and offer unrivalled luggage space.

And just as the streamlined interior respects the passenger, so the latest generation Euro 6 engine respects the environment.

Discover the many **EX**tras.

Discover the numerous amenities that contain the familiar Van Hool DNA. Because just like every other Van Hool product, the EX is born from our trusted core values: reliability, quality, functionality... and extreme efficiency.

Your **EX** solution.

What will your EX allow you to do now?

Getting passengers to their destinations efficiently through urban traffic with all practical facilities?
Transporting travellers to distant holiday resorts, surrounded by all the necessary comforts?

Whatever you will use it for, you will have the opportunity to optimise your EX according to your specific needs.

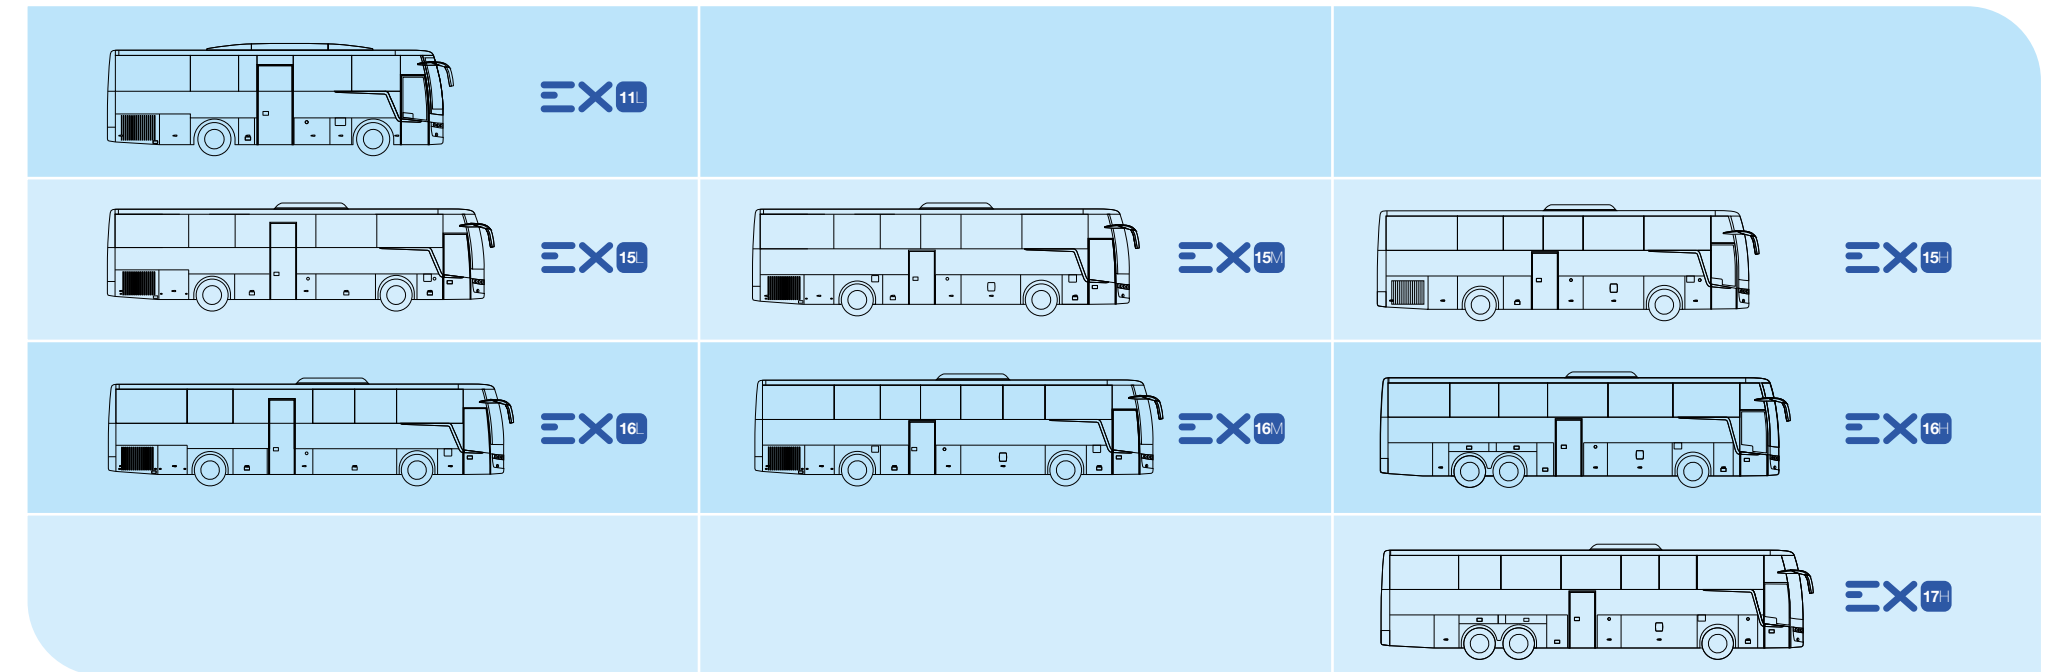

Our EX range.

Discover our versatile EX range. Whether you are looking for a small or large, high or low vehicle, we have the perfect option for you. Every model in the range is equipped with the latest generation of fuel-efficient AF MX engines, allowing you to enjoy the most reliable and comfortable driving experience.
