

TDX

Take the next step.

VANHOOL

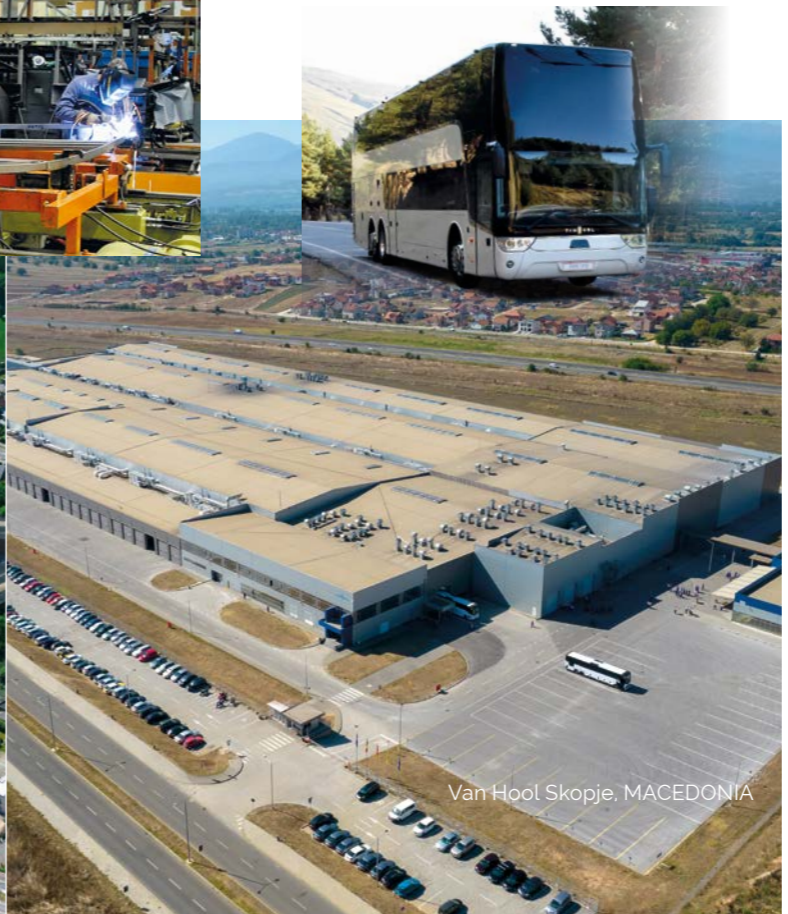

Welcome to the world of Van Hool.

Yesterday.

Bernard Van Hool was attracted to construction and innovation from an early age. During the reconstruction after World War II, he saw the need for suitable vehicles for the efficient transport of both materials and people. For that, he developed his first coach. With the boom in tourism, this quickly set the direction for the road we are still on today.

Van Hool Koningshooikt, BELGIUM

Van Hool Skopje, MACEDONIA

Today.

Today, Van Hool can look back on a rich history. What was founded in 1947 by a father and his sons is today a dynamic and ever-innovating company with some 4,000 motivated employees who deliver quality vehicles to customers all over the world every day. Therefore, the 'Van Hool' brand stands for solidity, quality, reliability and an extremely well-crafted finish. And we are not standing still. Our expertise and sense of innovation still produce new solutions every day.

TDX: the next step.

Inter-city routes, short trips or long tourist trips... we have the right coach for every target group and every destination. Durable, comfortable and reliable, with that extra touch to make the trip unforgettable.

Our TDX range is the next step in the constant evolution of our coaches. The result of an ongoing quest for ever-higher levels of comfort and safety for travellers and drivers. As always elegant and efficient, timeless and contemporary, with a focus on passenger, driver, and the environment.

Technical concept

We remain true to our successful chassis, which allows us to ensure the reliability and quality of our vehicles. We also constantly keep our finger on the pulse of new technologies and electronic systems that can contribute to an even better driving experience for both passengers and drivers.

We also understand the growing need for eco-friendly transport solutions. This is why we offer our customers a wide range of engines that meet the highest environmental standards. That way, our customers can make a conscious choice for a more sustainable travel experience, without compromising on the performance and quality they expect from us.

Maintenance-friendly concept

When constructing our coaches, we make optimal use of corrosion-resistant materials. We aim for durability and longevity, which is why, if necessary, we apply extensive anti-corrosion protection that meets the high Van Hool standards. In this way, we ensure reliability and make sure our vehicles can withstand the challenges of the times.

Discover our **TDX** range.

TDX front

The TDX is distinguished by an elegant and timeless design that flows seamlessly from the front to the flank and rear of the coach.

Entry doors

Our entry doors combine sophisticated design with reliable functionality. The front entry door with lowered glass line provides optimum visibility around the vehicle, giving drivers an excellent overview.

Smooth sideline

The stainless steel window frame immediately catches the eye, and is a distinctive visual element of the TDX. The flat side of the vehicle contributes to its aerodynamic properties, minimising fuel consumption.

Exterior lighting

For increased safety, functionality and long life, the entire TDX range is equipped with the latest generation of LED lighting.

TDX rear

Our TDX combines dynamism and elegance without sacrificing interior space or seating. A central feature is the integrated air grille, which provides ample airflow to support the fuel-efficient Euro 6 engines.

Comfortable cruising.

MirrorCam

MirrorCams offer you a wider view than physical mirrors, and display reference lines on the cockpit monitors for safe overtaking and manoeuvring. This improves the safety of your passengers and other road users, and the comfort of your driver.

Multifunctional colour display

At a glance the colour display clearly and graphically shows the status of the vehicle. Combined with the multi-functional rotary knob, it is a user-friendly interface to all possible settings. Via the video input, the image from the reversing camera is displayed centrally.

Bosch Coach Infotainment System

The very latest generation of on board multimedia provides a fully digitised environment for experiencing music and film. Through a touchscreen, the driver keeps perfect control over the entirety of multimedia and connected devices.

Control buttons on the steering wheel

The steering wheel has ergonomic control buttons embedded in the supports. These are used to control functions such as the media system, telephone & cruise control.

Private storage compartment.

Integrated fridge (50 litres).

The TDX Air Conditioning.

Our entire TDX range is equipped with advanced and state-of-the-art air-conditioning that provides optimal ventilation, heating, air-conditioning and control. The compact AC 188 drop-in unit offers significantly improved capacity (35 kW cooling/42 kW heating) with greater

airflow and reduced noise emissions. Maintenance is also simplified by easy access to the filters and unit. The new 2-zone control, with separate temperature-controlled underfloor heating and individual sensors, provides an even temperature in the interior of the vehicle. Thanks to the graphic

display and the handy multifunctional rotary knob, operating the climate control system is simple and intuitive. This system provides a comfortable and user-friendly experience for both drivers and passengers.

Multifunctional rotary knob

From heating to lighting, from mirrors to controlling vehicle parameters, the driver has everything under control thanks to the new multifunctional rotary knob.

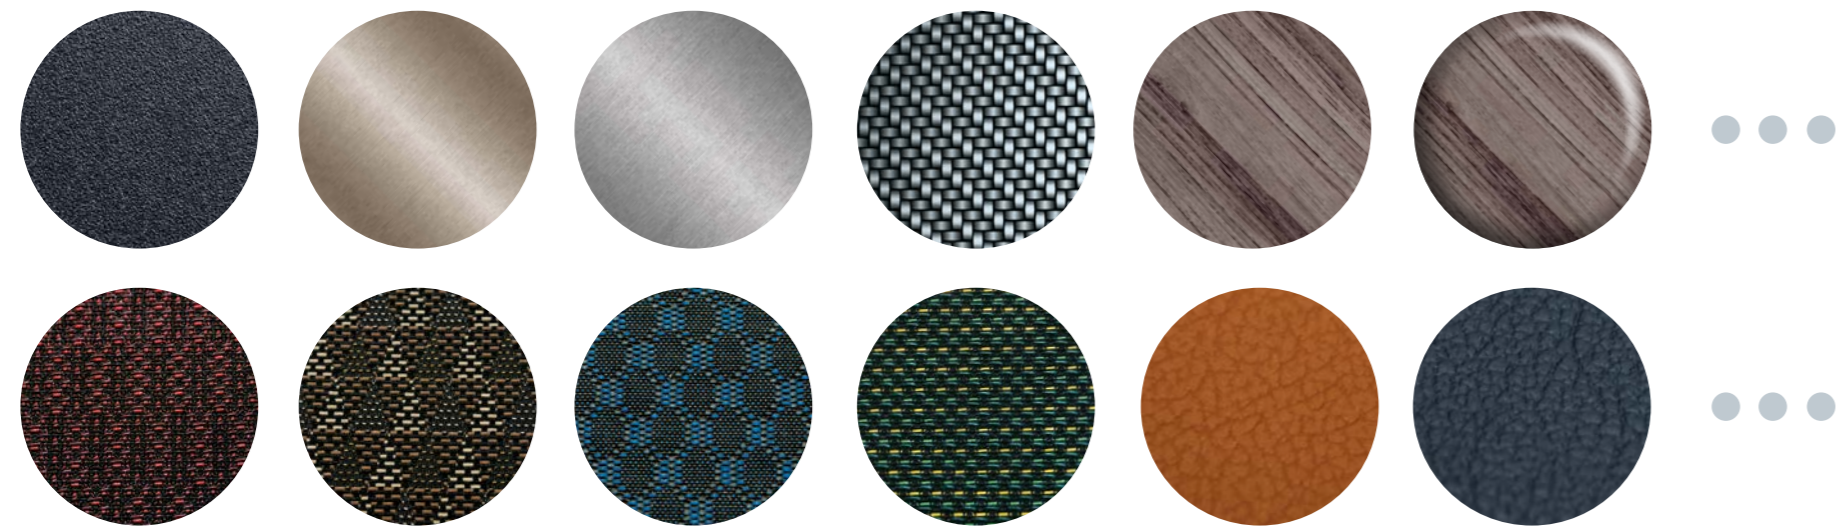

Explore the world in style.

Our **TDX.** Designed just for you.

No more difficult decisions.

Do you opt for bright and energetic, urban trendy or naturally zen? Our designers have already selected the ideal combinations of colours, fabrics and materials. And our extensive range is certainly not limited to what you see here...

TDX Altano

With the A of Allure.

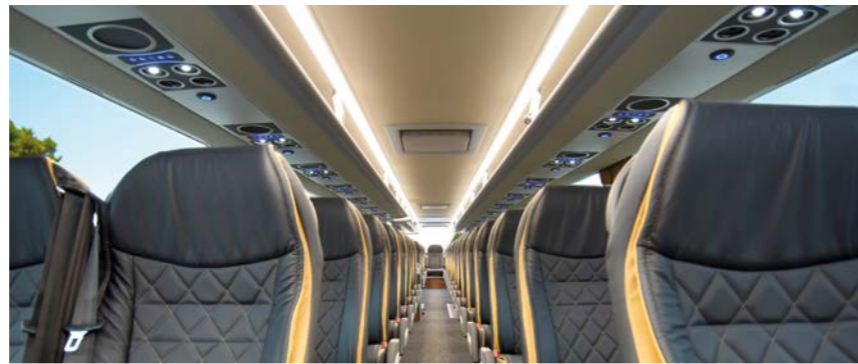

The name **Altano** refers to the generous height of the luggage compartment ("altus" means high). This tri-axle model is available in lengths of 13.20 m, 14.04 m and 15 m. The TDX naturally shares the characteristic features of the entire range: a solid chassis, a safe construction with an angled structure, an ergonomic dashboard with a centrally positioned LCD information screen and an integrated climate control system. With these features and a powerful engine, the Altano is ideal for travelling long distances in comfort. Moreover, with their longer front overhang, the TDX20 and TDX21 offer additional space for wheelchair-accessible facilities. This allows you to meet the needs of passengers with reduced mobility even better.

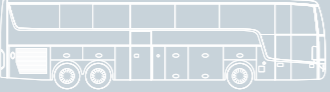

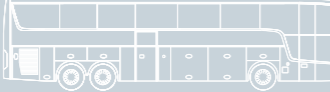

TDX Astromega

"Comfort at a high level" is more than a slogan, especially with the **Astromega**. Travelling on a Van Hool coach means instantly enjoying a pleasant atmosphere of holiday and relaxation. In these double-deckers, spacious stairs make boarding easy for everyone. Thanks to the optimal powertrain, passengers can relax quietly or enjoy the multimedia facilities undisturbed.

High-level comfort.
